

WRAP UP

© 2014, VITO NV 1

Some take-away messages

- » Scope definition is crucial – definition of DR – role of other features
- » Chicken and egg problem in many ways:
 - » No business model -> no incentive for buying SA
 - » No SA -> limited potential for flexibility/energy saving potential

© 2014, VITO NV 2

Some take-away messages

- » Policy process: follow closely MEErP
- » Horizontal approach

© 2014, VITO NV 3

Some take-away messages

- » Interoperability:
 - » Mainly work on info layer
 - » Neutral open data model is important
 - » Open standards
- » Technical issues e.g. interaction with building system, RES integration
